

WHAT WE'RE ABOUT

At Kingerlee Joinery, quality and reliability come as standard. One of the country's largest and best equipped workshops, it has won numerous awards and has a reputable customer base that includes hospitals, schools, banks and private companies. In recognition of our commitment to quality, we were recently upgraded to ISO9000:2001 quality control standard.

A CUSTOMISED SERVICE

All too often overlooked, joinery can lend immediate character and style to a building. Whether a staircase, front entrance or reception desk, the quality of joinery speaks volumes. That's why choosing a proven supplier is so important: get the joinery right and you're well on the way to achieving exactly the look and feel you want.

A TRADITION OF QUALITY SINCE 1868

SKILLED PEOPLE

At Kingerlee, we value our people. All members of our staff receive ongoing training to ensure we have both the traditional skills and modern techniques necessary to deliver great value service. Our emphasis on the personal and professional development of our staff was recently rewarded with Investor In People status.

BUILT TO LAST

Established in 1868, our family business has provided high quality building around Oxford for five generations. Today, we employ over 120 staff across our three divisions: Contracting, Special Projects and Joinery. While our commitment to quality has never changed, we're continually developing our skills and technical knowledge to bring you the latest and best in joinery design, building and restoration.

ENVIRONMENTALLY AWARE

Environmentally conscious building is increasingly in demand, and at Kingerlee we do our best to be kind to the environment. We source all of our materials from reputable suppliers with good environmental credentials. If needed, we can make sure that all the materials used on your project are from fully certified sources.

TRADITIONAL METHODS

Our highly trained craftsmen are masters of both traditional techniques and modern methods and materials. As well as general joinery, we produce both machined goods and bespoke design. We also specialise in the sympathetic restoration and reworking of older pieces. We'll work closely with you to identify the best value joinery solution for your project.

COMPREHENSIVE SERVICE

We're here to help you at every stage of joinery work, from specifying and estimating the work you need done, right through to installation and finishing. Whether you need a comprehensive service, or just help at a particular stage, we're flexible and willing to fit our service precisely to your needs.
